CRANE RAIL & ACCESSORIES

BR&L

a division of **A.STUCKI**
.....COMPANY

Supplying a complete inventory of overhead crane rail and matching accessories for all your industrial needs.

OUR CAPABILITIES

BR&L inventories rail and custom-made accessories for crane rail runway construction. We provide solutions for crane runway installation.

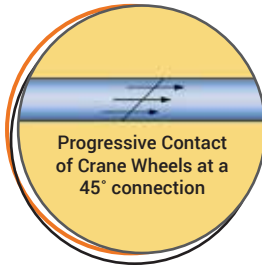

Our rail inventory includes "ASCE" rail for lighter-material cranes ranging from 10 to 30 tons based on CMAA recommendations and "Crane" rail for heavy-duty cranes with high-frequency use and large loads.

We supply hook bolts, rail clips, clamp and filler sets, rail lifting screw clamps, adjustable clips, splice bars, crane stops and other accessories.

We offer specialized services, including custom miter cuts and expansion joint and crane stop installation.

CORE COMPETENCIES

Crane Runway System

Our Birmingham Rail "Bridge the Gap" Crane Runway System provides a solution for reducing vibrations and excess wear at the joints by utilizing a 45-degree miter cut with machined ends and special stabilizing angle bars. The resulting gap-free connection creates a larger bearing surface without the cost or installation issues of welded systems and increases the crane rail lifespan.

Adjustable Rail Clip

We offer a two-piece adjustable, rubber nose, single bolt BR&L 3085 Rail Clip assembly for rail sections from 30 to 105 pounds. Each assembly is furnished with a weldable lower component, upper component and bolt assembly, providing flexibility for rail movement in high-capacity overhead cranes and consistency with runway rail positioning.

Rail Lifting Clamp

Our Rail Lifting Clamp can be used to lift any size rail with equal opening and closing of both jaws for simple and quick assembly.
